EDUCATION

UNIVERSITY OF CALIFORNIA, IRVINE

Bachelor of Science in Computer Science: GPA: 3.3 / 4

09/2019 - 06/2021

SKILLS

- Programming Languages: TypeScript, JavaScript, Python, Java, C, C++
- Web Technologies: React, Node.js, Vite, HTML5, CSS3, Redux, Material UI
- Databases: DynamoDB, MongoDB, PostgreSQL, Redis, MySQL
- CI/CD & Cloud: GitHub Actions, AWS Lambda, CDK, Step Functions, API Gateway, CloudFront, Terraform, CloudFormation, Docker, Kubernetes
- Architectures: Microservices, REST, Serverless, Event-Driven Systems, Module Federation
- Monitoring: Splunk, AWS X-Ray, CloudWatch
- Languages: English (Fluent), Armenian (Native), Arabic (Native)

WORK EXPERIENCE

AAA | Full-Stack Engineer | Irvine, CA

01/2023 - Present

Travel Digital Platform & Cloud Infrastructure - Auto Club Enterprises

(TypeScript, React, Redux; Node.js, AWS Lambda, CDK; API Gateway, CloudFront, DynamoDB, S3; Salesforce, Mulesoft; GitHub Actions, CloudFormation; Playwright, Jest)

- Co-architected zero-downtime deployment workflow adopted by 2 product organizations, orchestrating dual-region AWS CDK deploys through DynamoDB deploy windows with automated health checks and rollback; shipped production safe-deploy pipelines for travel booking and advisor platforms spanning 12 Lambda APIs and web delivery paths
- Primary engineer for travel appointment booking and advisor discovery on AAA.com — 12 AWS Lambda services and 2 React applications on Salesforce and Mulesoft — across 4 appointment channels (in-branch, virtual, phone, email-advisor) with Playwright regression coverage and Splunk production monitoring
- Engineered real-time Meta and TikTok advertising lead pipeline on AWS Step Functions and Lambda, processing webhook events to Salesforce CRM in under 5 seconds
- Shipped 2 greenfield travel products from architecture through production: member-account bookings micro-frontend via Module Federation and CDN-delivered help widget with Salesforce live chat deployed across AAA.com travel surfaces
- Migrated 4 core insurance quote-bind endpoints from PCF to AWS Lambda; standardized 20+ serverless packages on AWS CDK and GitHub Actions CI; led Elasticsearch-to-MongoDB transition and shipped Missouri Guidewire state expansion

Ford Motors | Software Engineer | Irvine, CA

01/2022 - 12/2022

Autonomous Vehicles Orchestration UI/UX Backend - Ford Next

(Java, Spring Boot, GCP CloudRun, Pub/Sub, gRPC, WebSocket, AWS Lambda, PostgreSQL, Redis, Tekton, Kubernetes, Terraform, OAuth2.0, JUnit)

- Migrated Java microservices from AWS Lambda to GCP CloudRun and implemented Pub/Sub, gRPC, and WebSocket for real-time autonomous vehicle orchestration data exchange
- Embedded OAuth, OIDC, and JWT authentication via Spring Security and automated 42Crunch, SonarQube, and Fossa security gates in Tekton on every build
- Cut data transformation latency 95% and deployment time 40% across 3 services through OpenShift, Tekton, and Terraform pipeline automation

PROJECT WORK

Fabflix | Code

06/2021

Full-stack movie commerce platform — 21,000+ titles (Java, MySQL, JavaScript, Bootstrap, jQuery, AJAX)

- Cut search latency 75% (4s to 1s) via query caching and full-text autocomplete across 21,000+ title catalog
- Reduced 200,000-record database load time 99.7% (30 min to 5 sec) by engineering XML-to-CSV ETL pipeline; hardened authentication with ReCAPTCHA, HTTPS, and master-slave load balancing for 500+ concurrent users
